Welcome to Ten Acre Wood - Nestled among mature trees on a serene 10-acre parcel, this newly built, fully winterized 2-bedroom home offers the perfect balance of privacy, comfort, and access to the very best of Haliburton County.

Inside, you'll find a spacious, open-concept kitchen ideal for hosting or quiet evenings in, a cozy living area, and a screened-in porch thats perfect for working remotely or enjoying your morning coffee in nature listening to the songbirds. Forced air propane heating ensures year-round comfort, and a GenerLink system is already installed for convenience.

Located just 13 minutes east of the shops, restaurants, grocery stores and galleries of Haliburton Village, this thoughtfully designed 4-season property is ideal as a full-time residence, cottage escape, or short-term rental investment. A short walk takes you to a peaceful rocky point on Minnicock Lake, while nearby municipal boat launches provide easy access to boating and swimming. In fall, the landscape comes alive with vibrant colour, and in winter, you're just 30 minutes from skiing at Sir Sam's and 15 minutes from snowmobile trails.

The home is situated on a municipally maintained road for reliable year-round access. Whether you're an outdoor enthusiast, artist, or remote worker, this property offers the space, scenery, and inspiration to make it your own.

# 1462 Minnicock Lake Road, Highlands East, ON

Main Floor Exterior Area 600.16 sq ft
Interior Area 551.19 sq ft

PREPARED: 2025/06/25

# 1462 Minnicock Lake Road, Highlands East, ON

# **Property Details**

### **Room Measurements**

Only major rooms are listed. Some listed rooms may be excluded from total interior floor area (e.g. garage). Room dimensions are largest length and width; parts of room may be smaller. Room area is not always equal to product of length and width.

# **Main Building**

MAIN FLOOR

3pc Bath: 7'7" x 6'10" | 52 sq ft Bedroom: 9'3" x 10'1" | 75 sq ft Dining: 9'8" x 6'9" | 66 sq ft Kitchen: 9'3" x 11'3" | 98 sq ft Living: 11'1" x 11'11" | 132 sq ft Primary: 9'4" x 10' | 76 sq ft

### Floor Area Information

Floor areas include footprint area of interior walls. All displayed floor areas are rounded to two decimal places. Total area is computed before rounding and may not equal to sum of displayed floor areas.

# **Main Building**

MAIN FLOOR

Interior Area: 551.19 sq ft

Perimeter Wall Thickness: 6.0 in

Exterior Area: 600.16 sq ft

### Total Above Grade Floor Area, Main Building

Interior Area: 551.19 sq ft Exterior Area: 600.16 sq ft

# 1462 Minnicock Lake Road, Highlands East, ON

### **iGUIDE Method of Measurement**

### **Definitions**

Interior Area is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

**Excluded Area** is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

Exterior Wall Footprint is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

Exterior Area is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

**Grade** is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

Total Interior Area is the sum of all Interior Areas.

Total Excluded Area is the sum of all Excluded Areas.

Total Exterior Area is the sum of all Exterior Areas.

Finished Area is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

**Unfinished Area** is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

### **Notes**

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

### Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.

### **PDF Floor Plans**

### Specimen details / Détails sur l'échantillon:

Barcode / Code à barres: 012858275

Phone # / # tal : 647 233 5068

Date/Time Collected / Data/heure du prélèvement\*; 2024-10-29 15:15:00

Date/Time Received / Date/hours Recu let: 2024-10-31 14:39:00

Specimen Note / Note sur l'échantillon:

This specimen was received in good condition unless otherwise stated. A moins d'avis contraire, l'échantillon était en bonne condition au moment de la réception.

### Test results / Résultats d'analyse:

Total Coliform CFU/100 mL / Coliformes totaux UFC/100 mL

E.coli CFU/100 mL / E. coli UFC/100 mL

Interpretation / Interprétation:

There is no evidence of fecal contamination. If the results show the presence of coliforms it may be indicative of a contaminated water supply. Given the susceptibility of well water to external influences, it is important to test water frequently. Consult local health unit for information if required. Il n'y a aucune preuve de contamination fécale. Si les résultats indiquent la présence de coliformes, cela peut être révélateur d'une source d'eau polluée. L'eau des puits étant susceptible d'être dégradée par des facteurs externes, il est important de la faire analyser fréquemment. Consultez le bureau local de

Date of Analysis / Date de l'analyse:

2024-10-31

Date Reed / Analyse effectude is: 2024-11-01

### Please Note / Prière de noter ce qui suit :

This negults apply to the sample as received/Las résultats s'appliquent à l'échantilion, tel que reçu.

santé publique pour plus de détails, si nécessaire.

These results relate only to the sample tested. / Le résultat obteriu se rapporte assulament à cel échamillon d'eau analysé

Note: This water sample was only tested for the presence of both Total Coliforms and E. coli (ISO/IEC 17025 according tests) becterial indicators of contamination by Membrane Filtration. The sample was not tested for other contaminants, including chemical contaminants, and therefore may be unsafe to drink even when there is no significant evidence of bacterial contamination. Contact your local public health unit for information on testing for other contaminants. Hermanque: Cel échantillon d'asu n's été analysé que pour déceler (par un laboratoire accrédité conformément à la norme (SCHEC 17025) la présence des poliformes totaux et des bactéries collibacillaires, indicateurs de contamination par filtration sur membrane. L'échantillon n'a pas été testé pour d'autres contaminants, y compres les contaminanta chimiquee el, par consiquent, l'eau peut être impropre à la consommation même lorsquill n'y a aucune preuve significative de contamination bactérienne. Veuillez communiquer avec le bureau de santé publique de votre localité pour vous renseigner au sujet de l'analyse visant à détecter la présence
