Set on 46 acres and tucked back from the road down a private, tree-lined laneway, this spacious family home offers the perfect blend of privacy, space, and convenience. With room to grow both inside and out, this property is ideal for families looking to embrace country living without sacrificing access to amenities. Located just 15 minutes from the Village of Haliburton, you'll enjoy easy access to schools, grocery stores, restaurants, healthcare services, local shops, recreation facilities, and year-round community events. Situated on a school bus route, the property is well suited for busy family life.

This raised bungalow offers approximately 1,600 sq ft on each level, providing over 3,200 sq ft of living space to spread out and enjoy. The main floor is designed for gathering, featuring a large open-concept kitchen and dining area that easily becomes the heart of the home. The sunken living room is warm and inviting with a wood-burning fireplace and large windows that fill the space with natural light. Three bedrooms, a bathroom, a laundry room, and access to a 12' x 18' screened porch complete the main level. The walkout lower level adds even more flexibility for growing families. Here you'll find a large open space, a large recreation room complete with a wood stove and bar area, a fourth bedroom, and a 3-piece bathroom-perfect for teenagers, overnight guests, or multi-generational living.

Outside, the possibilities continue with a 30' x 40' detached garage and an 18' x 20' drive-through shed, providing exceptional storage for vehicles, tools, recreational equipment, and hobbies. The 46-acre property itself is a true playground for outdoor enthusiasts. With expansive forested land, there is plenty of room for hiking, hunting, exploring, creating recreational trails, and enjoying nature right in your own backyard. Offering space, privacy, and endless opportunities for family adventures, this is the type of property where memories are made for years to come.

iGUIDE Method of Measurement

Definitions

Interior Area is a per floor calculation, made by measuring to the inside surface of the exterior walls. The footprint of all interior walls and staircases is typically included.

Excluded Area is a sum of the area of all rooms (measured to the inside surface of room walls) that are excluded from the Interior Area for a floor and the footprint of corresponding walls. Prescribed area exclusions can vary from region to region. Examples of exclusions are spaces open to below, garages, cold cellars, crawl and reduced height spaces.

Exterior Wall Footprint is the sum of the estimated area of the perimeter wall segments bounding both Interior and Excluded Areas.

Exterior Area is a per floor calculation, made by measuring to the outside surface of the exterior walls and is represented by the sum of the Interior Area and the Exterior Wall Footprint.

Grade is the ground level at the perimeter of the exterior finished surface of a house. A floor is considered to be above grade if its floor level is everywhere above grade.

Total Interior Area is the sum of all Interior Areas.

Total Excluded Area is the sum of all Excluded Areas.

Total Exterior Area is the sum of all Exterior Areas.

Finished Area is a per floor calculation made by adding all enclosed areas in a house that are suitable for year-round use based upon their location, embodying walls, floors, and ceilings and which are similar to the rest of the house. Footprint of walls is attributed to finished area only when the walls are bounding finished areas.

Unfinished Area is a per floor calculation made by adding all enclosed areas that do not meet the criteria for Finished Area. Exceptions are outdoor and non-walkable areas, for example porches or areas open to below. Footprint of walls is attributed to unfinished area only when the walls are exclusively bounding unfinished areas.

Notes

For exterior walls that are adjacent to the outside of the property, where typically only the interior side has measurement data, an estimation of the exterior wall thickness (as directly measured at the property) is used to calculate its footprint. Considerations are not made for varying wall thickness along the perimeter.

Disclaimer

All dimensions and floor areas must be considered approximate and are subject to independent verification.
